

LeafAI

Leaf-Connect (Data Logger) Installation

Step 1: Mount the Antenna

- Take the provided antenna and securely attach it to the top right of the Leaf-Connect by gently screwing it in place.

Step 2: Select your position

- Position the Leaf-Connect at your desired location **above your crops**.

Step 3: Attach the Sensor and install your sensor

- Secure the sensor to the underside of the Leaf-Connect.
- **Install** your sensor as described in the respective **Sensor Guide**.

Step 4: Power on the Leaf-Connect

- Turn on the Leaf-Connect on the side by pressing the power button inwards until it clicks into place.
- The green LED briefly turns on.

Step 5: Incorporate your sensor into Leaf-MyGrow

- Scan the QR Code on your Leaf-Connect with your camera on your smartphone.
- Login with your email and password.
- Following the steps.

Your sensor has been added successfully!

You can display your data on Leaf-MyGrow <https://mygrow.leafai.io>
